The figure consists of 12 sub-diagrams arranged vertically, each showing a grid of points and lines representing the steps of an algorithm. The steps are numbered 1 through 12. The diagrams illustrate the process of selecting points, moving them, and connecting them to form a path or structure. The grid is composed of small squares, and the points are represented by dots. The lines represent the connections between the points. The steps show the progression of the algorithm, from the initial selection of points to the final connection of the points.

Figure 1 displays a 4x4 grid of plots showing the evolution of the probability distribution $p(x)$ for different values of α (0.0, 0.2, 0.4, 0.6) and x (0, 1, 2, 3). The plots illustrate how the distribution changes as α increases, showing a shift towards higher values of x .
